

To whom it may concern,

More laws means less music distribution companies.

Less companies means less jobs.

Less jobs means weaker economy.

Conversely:

Less laws means more music distribution companies.

More companies means more jobs.

More jobs mean stronger economy.

Obviously it is not that simple, but in my completely non-expert opinion, *I will spend more money on music services* if those services have access to a broader range of music. Period.

Respectfully,
