

I am supporting-smartphones/tablets jailbreaking exemption.

? I am user

? I want to ensure legal authority to jailbreak iPhone, iPod, iPads, androids and all other smartphones.

? I want to jailbreak because Manufacturer sometimes take long time to patch the security and also the don't want to release some cool stuff you can do on their devices.

? I am not a developer but i don't like some app rejected because it competes with Manufacture or Service Provider like ATT,Verizon etc...

? Please Legalize Jailbreak of smartphones and tablets for long time(5-10 yrs or more) instead of short period of time(1-2 yrs).
