Long Comment Regarding a Proposed Exemption
Under 17 U.S.C. 1201
(Proposed Class #5)

☐ Check here if multimedia evidence is being provided in connection with this comment

Item 1. Commenter Information

This Comment is submitted on behalf of Entertainment Software Association; Motion Picture Association of America, Inc.; and Recording Industry Association of America (collectively the “Joint Creators and Copyright Owners”). The Joint Creators and Copyright Owners may be contacted through their counsel, Steven J. Metalitz, J. Matthew Williams and Naomi Straus, Mitchell Silberberg & Knupp LLP, 1818 N St., NW, 8th Fl., Washington, D.C., 20036, Telephone (202) 355-7900.

The Joint Creators and Copyright Owners are trade associations representing some of the most creative and innovative companies in the United States.

The Entertainment Software Association (“ESA”) represents all of the major platform providers and nearly all of the major video game publishers in the United States. ESA is the U.S. association exclusively dedicated to serving the business and public affairs needs of companies that publish computer and video games for video game consoles, handheld devices, personal computers, and the Internet. ESA offers a range of services to interactive entertainment software publishers, including but not limited to: a global content protection program; business and consumer research; government relations; and intellectual property protection efforts.

The Motion Picture Association of America, Inc. (“MPAA”) is the voice of one of the country’s strongest and most vibrant industries – the American motion picture, home video and television industry. MPAA works to advance the business and the art of filmmaking and to celebrate its enjoyment around the world. MPAA members include: Walt Disney Studios Motion Pictures; Paramount Pictures Corporation; Sony Pictures Entertainment Inc.; Twentieth Century Fox Film Corporation; Universal City Studios LLC; and Warner Bros. Entertainment Inc.

The Recording Industry Association of America (“RIAA”) is the trade organization that supports and promotes the creative and financial vitality of the major music companies. Its members comprise the most vibrant record industry in the world. RIAA members create, manufacture and/or distribute approximately 85% of all legitimate recorded music produced and sold in the United States. In support of its mission, the RIAA works to protect the intellectual property and First Amendment rights of artists and music labels; conduct consumer, industry and technical research; and monitor and review state and federal laws, regulations and policies.
**Item 2. Proposed Class Addressed**

The December 12, 2014 Notice of Proposed Rulemaking ("NPRM") described this proposed class of works as allowing "circumvention of access controls on lawfully made and acquired motion pictures used in connection with multimedia e-book authorship. This exemption has been requested for audiovisual material made available in all formats, including DVDs protected by CSS, Blu-ray Discs protected by AACS, and TPM-protected online distribution services." 79 Fed Reg. 73,856, 73,861 (Dec. 12, 2014).

**Item 3. Overview**

The Joint Creators and Copyright Owners do not oppose renewal of the existing exemption related to non-fiction multimedia e-books offering film analysis. See 37 C.F.R. § 201.40(b)(4)(iii); 37 C.F.R. § 201.40 (b)(5)(iii). However, they do oppose any expansion of that exemption to allow for circumvention of Blu-ray Discs or videogames. They also oppose expanding the exemption to cover e-books of fiction and e-books that do not offer film analysis; e-books that do not involve criticism or commentary; and e-books that make use of more than “short portions” of motion pictures. The proponents have failed to meet their burden of persuasion on these issues because the Register’s reasoning from her 2012 Recommendation remains as true today as it was then, if not more so. See Recommendation of the Register of Copyrights, Section 1201 Rulemaking: Fifth Triennial Proceeding, 125, 130, 135, 138-39 (Oct. 12, 2012) ("2012 Recommendation"); see also Exemption to Prohibition on Circumvention of Copyright Protection Systems for Access Control Technologies; Notice of Inquiry and Request for Petitions, 79 Fed. Reg. 55,687, 55,689 (Sept. 17, 2014) ("2014 NOI").

**Item 4. Technological Protection Measure(s) and Method(s) of Circumvention**

The proponents of this exemption, the Authors Alliance ("Alliance"), et. al., describe the myriad access controls at issue on pages 4 through 7 of their February 6, 2015 comments. They include the Content Scramble System ("CSS"), the Advanced Access Content System ("AACS"), and a variety of TPMs used to protect online content.

---

1 The Joint Creators and Copyright Owners continue to believe that the exemptions related to educational uses of motion pictures, filmmaking, multimedia e-books, and non-commercial videos should be separated into distinct exemptions that allow the Office to tailor each exemption to the specific contexts at issue.

2 All cited materials from previous rulemaking cycles can be accessed via the Copyright Office website at [http://www.copyright.gov/1201/](http://www.copyright.gov/1201/) under “Past Proceedings.”

3 The burden of coming forward with evidence in support of the proposed exemption, as well as the burden of persuasion that the exemption should be recognized on the narrow grounds authorized by the statute, must always remain with the proponent of an exemption. 2014 NOI at 55,689. This burden applies to both factual and legal issues.
As discussed further below, these access controls have increased the availability of works and have allowed for a vast proliferation of platforms on which consumers can enjoy authorized access to an increasing variety of content. It is easier than ever to access a broad selection of films and television shows, and on many different devices. The confidence afforded by the security of TPMs, and the flexibility in business models that such TPMs enable, are essential marketplace pillars which have led creators of motion pictures to expand their streaming and downloading options and to experiment with a broad range of business models to increase access to their works, such that some films can now be purchased and digitally downloaded before they are made available on physical discs.

Item 5. Asserted Noninfringing Use(s)

Although the Joint Creators and Copyright Owners believe that e-book authors likely often engage in fair uses of materials from motion pictures, there is no across-the-board fair use exception applicable to literary uses. Authors must be careful not to step on the rights of others while they pursue their own work. Although the Register more closely analyzed fictional filmmaking in the 2012 Recommendation than she did fictional e-book authorship because the proponents of the e-books exemption did not introduce any examples of fair uses of motion pictures in fictional e-books, 2012 Recommendation at 138, the Register’s analysis of fictional filmmaking applies equally to fictional e-book authorship.

It is true that the use of motion picture excerpts in a fictional film may enhance the film, but that does not necessarily mean that the use is fair. Notably, fictional films differ … because there is no basis to assume that fictional films’ primary purpose is to offer criticism or comment. Rather, the purpose of a fictional film is typically entertainment. … The use of an earlier work to flesh out characters and motivations in a new work, or to develop a storyline, does not inherently serve the purpose of criticism or comment on the existing work. Indeed, the use of an earlier work or works as the basis for a new work could give rise to a concern that the new use might supplant the derivative market for the existing work.

2012 Recommendation at 130.

Given that many uses of portions of motion pictures in fictional e-books should be licensed, and that MPAA member companies would actively offer and grant such licenses if they were requested, the Joint Creators and Copyright Owners oppose the creation of a new exemption applicable to fictional e-book authorship. They also oppose expanding the existing exemption beyond its current scope. This opposition is especially necessary because the

See, e.g., Salinger v. Colting, 607 F.3d 68 (2d Cir. 2010).

All of the examples of purported fair uses of portions of motion pictures in multimedia e-books contained in the proponents’ current comments also relate only to non-fiction e-books offering film analysis.

It is worth noting that MPAA member companies do not receive many, if any, requests for licenses from multimedia e-book authors.
proponents of the exemption do nothing to try to define specific parameters within which e-book authors should operate to restrain the scope of the exemption. Indeed, the proponents even argue against preserving the limitations that currently apply to the exemption for non-fiction authorship offering film analysis, such as the requirement that any portions taken from motion pictures be “short” and be used for the purpose of criticism and comment. Those requirements at least render the existing exemption more compatible with fair use given that the first and third factors specifically favor criticism and commentary and the use of no more of a work than is necessary to accomplish a legitimate purpose, respectively. See 17 U.S.C. § 107(1) and (3). There is no guarantee that uses of long portions of motion pictures in non-fiction or fictional e-books that do not involve criticism and commentary will qualify as noninfringing.

**Item 6. Asserted Adverse Effects**

Similar to the record presented to the Register in 2012, the current record “establishes that there is some amount of motion picture material that may be available only on Blu-ray discs, such as bonus material or, more rarely, entire films released exclusively on Blu-ray.” 2012 Recommendation at 135. However, also like the record in 2012, “the few cited uses of Blu-ray-exclusive content are insignificant in number.” Id. In fact, many of the 19 examples of purportedly exclusive Blu-ray content offered by the proponents in their Appendix E refer to material that is not exclusively available on Blu-ray Discs. For example, the very first item on the list, a film called *Beat the Devil*, is available on Amazon in DVD format and as a digital download. Likewise, the two discs in the *Blade Runner* Five-Disc Complete Collector’s Edition that contain “extras” are on DVD, not Blu-ray Disc. The five versions of the film in that Collector’s Edition are all available on DVD, and three of the versions are also available as high definition digital downloads. The *Gone With The Wind* 70th Anniversary Ultimate Collector’s

---

7 In 2012, the Register stated that “the use of only short segments is critical to the Register’s determination that a significant number of the desired uses are fair.” 2012 Recommendation at 138. The Register also stated that she “considers the desire to engage in criticism or commentary to be a critical factor in establishing fair use in these contexts.” Id. at 139.

Edition, another purported example of exclusive Blu-ray content, in fact was released in both Blu-ray and DVD. Many of the other examples involving “bonus” features also appear to refer to materials that, while perhaps not available in the DVD format, are available either through online services, such as Amazon Shorts, or on digital copies that are provided to consumers when they purchase Blu-ray Discs. It is also not true, as Appendix E appears to claim, that every Pixar title is only available on Blu-ray Disc.

Given that the proponents could not even identify twenty examples of materials that are purportedly not available in formats other than Blu-ray, and that at least some of the materials they identified are available in such formats, the Register should conclude, as she did in 2012, “that the record does not reflect a substantial adverse impact due to the inability to use motion picture materials contained on Blu-ray discs.” 2012 Recommendation at 135. This is especially true because the proponents are simply wrong that Blu-ray is “domina[nt],” “the most widely available and standardized format,” and “quickly supplanting DVDs as the predominant source of motion picture material.” Alliance Class 5 Comment at 12, 14, 19. Instead, far more titles are available on – and sold on – DVD than are available on – or sold on – Blu-ray Discs. As reported by the “DVD and Blu-ray Release Report,” with respect to physical media, DVDs remain the industry standard, with far more titles being released each year on DVD than on Blu-ray. For example, in 2014, nearly 5,000 feature film and television titles were released on DVD, while fewer than 1,500 titles were released on Blu-ray. Moreover, in that same year, 439 million DVDs were purchased, versus only 127 million Blu-ray Discs. As reported by Home Media Magazine, Blu-ray Discs have accounted for only 22% of all discs sold in 2015, while DVDs constitute 78% of all disc sales. MPAA member studios report that they are not aware of any of

---

12 For example, many bonus features for the film Sin City are available through Amazon for free. http://www.amazon.com/s/ref=nb_sb_noss_1?url=search-alias%3Dvideo-shorts&field-keywords=sin+city, Exhibit 10 attached hereto.

13 For example, the Guardians of the Galaxy Blu-ray Disc is sold with a companion digital copy that includes the same bonus extras as the Blu-ray Disc. See Exhibit 11 attached hereto. Likewise, the Frozen Blue-ray Disc is sold with a companion digital copy that includes the same bonus extras as the Blu-ray Disc. See Exhibit 12 attached hereto.

14 For example, Pixar’s Short Films Collection 1 is available on DVD at http://www.amazon.com/Pixar-Short-Films-Collection-Volume/dp/B000V1Y44G.
their films that have been released exclusively on Blu-ray Disc. A handful of titles may have been released on Blu-ray Discs as “special editions” or with “bonus footage” without a DVD counterpart; however, the main film would have been released on DVD and/or as a digital download.

Nor have the proponents demonstrated any adverse impact caused by access controls utilized in connection with audiovisual works other than motion pictures, such as video games. As was the case in 2012, the proponents have requested an expansion but have not put any facts in the record to support that request. 2012 Recommendation at 125.

**Item 7. Statutory Factors**

17 U.S.C. § 1201(a)(1)(C)(i) instructs the Register to consider “the availability for use of copyrighted works” broadly and in historical context. Whether the proposed purpose at issue is currently enabled in the precise manner desired by a proponent is not the only relevant question. Prior to passage of the Digital Millennium Copyright Act (“DMCA”), fair use did not entitle a user to access a work in the format of the user’s choosing, and the passage of the DMCA did not alter that fact.\(^\text{15}\)

Indeed, the use of access controls has facilitated wider availability of copyrighted motion pictures than ever existed prior to the DMCA; and digital copying methods that do not involve circumvention are far more prevalent, far more robust, and far more affordable than when the DMCA was enacted. Access controls are improving and expanding the audiovisual content available to the public at large, rather than diminishing it.

The integrity of the AACS technology used to protect Blu-ray Discs is an especially important component of the ecosystem that is resulting in the increased availability of motion pictures. The Register and the Librarian should not undermine the reliability of AACS by opening it up to widespread hacking, which could negatively impact “the market for or value of” some of the industry’s most exciting products.\(^\text{16}\)

As discussed above in Item 6, there are many available alternatives to obtaining portions of motion pictures from Blu-ray Discs. Thus, the third statutory factor disfavors granting an exemption as well.\(^\text{17}\)

**Item 8. Documentary Evidence**

Please see the attached Exhibits.

Actors: Humphrey Bogart, Jennifer Jones, Gina Lollobrigida, Robert Morley, Peter Lorre
Directors: John Huston
Writers: John Huston, Anthony Veiller, Claud Cockburn, Peter Viertel, Truman Capote
Producers: Humphrey Bogart, Angelo Rizzoli

Beat the Devil is a subtle comedy of manners. It's not a big Hollywood film, but a small independent (Bogart's own production company) that happens to have an amazing cast, is directed by one of the best (John Huston), with a Truman Capote screenplay. It's become one of my favorite off-beat films and can't recommend it enough.

What's not to like? Quite a bit if you read some of the disgruntled reviews below! But don't be dissuaded, it's a gem. And remember, Pauline Kael was a huge fan of this movie; if she's a reviewer you trust, that might be enough for you.

Other reviewers have outlined the plot so I won't go into that, and in any case, that's not the reason to watch this movie. The plot's certainly as good as any amusing Hitchcock film, with its MacGuffin and several surprising twists and comic suspense subplots unraveling throughout.

There are subtleties to Beat the Devil that apparently escape many reviewers, who perhaps wanted another formulaic 'noir' classic or some kind of slapstick laff-fest. If you like New Yorker cartoons, you'll likely enjoy this movie as much as I do: I've watched this movie at least 5 times and still love it.

Beat the Devil escapes categorization, except to say that it's a brilliant comic screenplay performed with skill and insight by several of the best actors of the 50s. Robert Morley is sublimely funny, and brings out the best in Peter Lorre and the other criminals in the gang.

Jennifer Jones is sexy and charming in her role as a compulsive liar, as is her classic and earnestly doltish husband. They reek naive British charm and are marvelous together, providing a poignant tension in contrast to the gang of conniving scoundrels.

“Gone With The Wind” 70th Anniversary Ultimate Collector’s Edition From Warner Home Video November 17

(August 10, 2009 – Burbank, CA) – Winner of 10 Academy Awards® including Best Picture, and still history’s all time domestic box-office champion ($1.5 billion*), “Gone with the Wind” has long been considered the most celebrated motion picture of all time. On November 17, Warner Home Video (WHV) will honor the romantic epic with a stunningly restored and remastered version, available for the first time on Blu-ray™. “Gone with the Wind 70th Anniversary Ultimate Collectors Edition” is sure to be a “must-have” for collectors of classic films, available both in Blu-ray as well as on DVD.* Domestic gross. adjusted for inflation (according to www.boxofficemojo.com)

The highlight of this new Blu-ray version of “Gone with the Wind” is how it looks and sounds. As they've done with “The Wizard of Oz,” Warner Home Video continues to maximize what the Blu-ray format can do in terms of picture and sound. With six times higher resolution than standard DVD along with the sonic excellence of Dolby TruHD, the film will be at its absolute pristine best. “You're going to see, hear and experience so much more with this Blu-ray edition,” said Jeff Baker, WHV Executive Vice President and General Manager, Theatrical Catalog. “Viewing ‘Gone with the Wind’ again on Blu-ray is like seeing it for the first time. You're brought into the saga of the war torn Tara so intensely, you feel as if all the characters literally come alive. At times, I felt as if I was on the set standing next to the camera watching Gable and Leigh as the whole scene unfolded.”

Brand new to these editions is a bonus disc with three new outstanding documentaries: • “1939: Hollywood’s Greatest Year” is a fascinating tribute to a year considered to be one of Hollywood’s greatest. This documentary, narrated by Kenneth Branagh, had its on-air premiere in July as part of TCM's month-long festival saluting that year’s ‘bumper-crop’ of films. • “Gone with the Wind: The Legend Lives On” is an exploration of the legacy of this most beloved film through illuminating interviews, footage and visits to historical sites, events and museums. • “Moviola: The Scarlett O’Hara Wars” - a 1980 WBTV Special, never before seen on home video. This historic 70th Anniversary Ultimate Collector’s Edition, limited and numbered, will be further enhanced with unique nostalgic premiums – a 40-page hardcover book with photos, production notes and more; a reproduction of the 1939 original program; eight 5” x 7” frameable art prints, and a CD soundtrack sampler. The UCEs will be available in Blu-ray for $84.99 and DVD for $69.92 SRP. A Two Disc Special Edition will also be offered with the film and commentary for $24.98 SRP. The documentary “The Making of a Legend” will also be available as a stand alone for $14.97 SRP. Orders for all are due October 13. About the Movie “Gone with the Wind” is the grandest, most ambitious and spectacular piece of filmmaking in cinematic history. With more than 50 speaking roles and 2400 extras, the film is the quintessential Hollywood epic – considered a “must have” for collectors, and one that can be watched again and again for generations to come. Clark Gable, Vivien Leigh, Leslie Howard and Olivia de Havilland star in “Gone with the Wind,” which for more than a half century has thrilled audiences with its eternal love affair, set in the South against the backdrop of the Civil War, between handsome Rhett Butler (Gable) and his sassy, headstrong heroine Scarlett O'Hara (Leigh). With each new generation, “Gone with the Wind” continues to grow in popularity as new audiences discover and embrace the David O. Selznick production of Margaret Mitchell’s Pulitzer Prize-winning novel.

Walt Disney Animation Studios presents a chilly twist on one of the most humorous and heartwarming stories ever told. "Disney Animation's best since The Lion King" (William Bibbern, CrowQuill) will melt your heart. Fearless optimist Anna sets off on an epic journey — teaming up with rugged mountain man Kristoff and his loyal reindeer Sven — to find her sister Elsa, whose icy powers have trapped the kingdom of Arendelle in eternal winter. Encountering Everests-like conditions, mystical trolls and a hilarious snowman named Olaf, Anna and Kristoff battle the elements in a race to save the kingdom. Bring home Frozen on Blu-ray High Definition — featuring a blizzard of never-before-seen bonus extras with gorgeous animation, memorable characters and unforgettable music. It's dazzling fun for the whole family!
