

I think the aereo should be given permission to license content as a cable company. This would not negatively impact the actual channels and would be beneficial for people in college like me wh cant afford cable as it currently is and would like to be able to stream the content digitally. It wll also create many jobs in my state of Massachusetts. We are looking for a popular startup and aereo is one of them. They will have an important impact on our economyand future. How you decide this will effect the future of many other live streaming cable services. Please think through your decision.
