**Re: Second Request for Reconsideration for Refusal to Register Promise Bracelet;
Correspondence ID: 1-143DTHF**

Dear Ms. Citrynell:

The Review Board of the United States Copyright Office (the "Board") has considered Ronaldo Designer Jewelry, Inc.'s ("Ronaldo Jewelry") second request for reconsideration of the Registration Program's refusal to register a jewelry design claim in the work titled "Promise Bracelet" (the "Work"). After reviewing the application, deposit copy, and relevant correspondence in the case, along with the arguments in the second request for reconsideration, the Board affirms the Registration Program's denial of registration.

I. DESCRIPTION OF THE WORK

The Work is a bracelet whose body consists of a twisted gold band between plain gold banding that is formed into a loop at the front of the bracelet. On the back curve of the bracelet, three sets of gold wires are wrapped around the body of the bracelet. Two more sets of gold vertical wires demarcate the end of the loop and a hook clasp that attaches to the loop. A round-cut red gemstone is attached to the end of the twisted gold band and is positioned inside the loop.

A photographic reproduction of the Work is set forth below.

II. ADMINISTRATIVE RECORD

On August 4, 2014, Ronaldo Jewelry filed an application to register a copyright claim in the Work. In a September 18, 2014 letter, a Copyright Office registration specialist refused to register the claim, finding that it “lacks the authorship necessary to support a copyright claim.” Letter from Guy Messier, Registration Specialist, to Kyle Citrynell, Seiller Waterman LLC (Sept. 18, 2014).

In a letter dated December 18, 2014, Ronaldo Jewelry requested that the Office reconsider its initial refusal to register the Work. Letter from Kyle Citrynell, Seiller Waterman LLC, to U.S. Copyright Office (Dec. 18, 2014) (“First Request”). After reviewing the Work in light of the points raised in the First Request, the Office re-evaluated the claims and again concluded that the Work “does not contain a sufficient amount of creative authorship to support a copyright registration.” Letter from Stephanie Mason, Attorney-Advisor, to Kyle Citrynell, Seiller Waterman LLC (May 28, 2015).

In a letter dated August 26, 2015, Ronaldo Jewelry requested that, pursuant to 37 C.F.R. § 202.5(c), the Office reconsider for a second time its refusal to register the Work. Letter from Kyle Citrynell, Seiller Waterman LLC, to U.S. Copyright Office (Aug. 26, 2015) (“Second Request”). In that letter, Ronaldo Jewelry disagreed with the Office’s conclusion that the Work does not include a sufficient amount of original and creative authorship to support registration under the Copyright Act. Specifically, Ronaldo Jewelry claimed that although the Work’s individual elements are shared and familiar shapes in the public domain, the selection, coordination, and arrangement of the elements, along with the author’s other artistic decisions, are sufficiently creative to support a claim to copyright. *Id.* at 2.

III. DECISION

A. *The Legal Framework – Originality*

A work may be registered if it qualifies as an “original work[] of authorship fixed in any tangible medium of expression.” 17 U.S.C. § 102(a). In this context, the term “original” consists of two components: independent creation and sufficient creativity. *See Feist Publ’ns, Inc. v. Rural Tel. Serv. Co.*, 499 U.S. 340, 345 (1991). First, the work must have been independently created by the author, *i.e.*, not copied from another work. *Id.* Second, the work must possess sufficient creativity. *Id.* Only a modicum of creativity is necessary, but the Supreme Court has ruled that some works (such as the alphabetized telephone directory at issue in *Feist*) fail to meet even this low threshold. *Id.* The Court observed that “[a]s a constitutional matter, copyright protects only those constituent elements of a work that possess more than a *de minimis* quantum of creativity.” *Id.* at 363. It further found that there can be no copyright in a work in which “the creative spark is utterly lacking or so trivial as to be virtually nonexistent.” *Id.* at 359.

The Office’s regulations implement the long-standing requirement of originality set forth in the Copyright Act and described in the *Feist* decision. *See, e.g.*, 37 C.F.R. § 202.1(a) (prohibiting registration of “[w]ords and short phrases such as names, titles, slogans; familiar symbols or designs; [and] mere variations of typographic ornamentation, lettering, or coloring”); *id.* at § 202.10(a) (stating “to be acceptable as a pictorial, graphic, or sculptural work, the work must embody some creative authorship in its delineation or form”). Some combinations of common or standard design elements may contain sufficient creativity with respect to how they are juxtaposed or arranged to support a copyright. Nevertheless, not every combination or arrangement will be sufficient to meet

this test. *See Feist*, 499 U.S. at 358 (explaining the Copyright Act “implies that some ‘ways’ [of selecting, coordinating, or arranging uncopyrightable material] will trigger copyright, but that others will not”). A determination of copyrightability in the combination of standard design elements depends on whether the selection, coordination, or arrangement is done in such a way as to result in copyrightable authorship. *Id.*; *see also Atari Games Corp. v. Oman*, 888 F.2d 878 (D.C. Cir. 1989).

A mere simplistic arrangement of non-protectable elements does not demonstrate the level of creativity necessary to warrant protection. For example, the Ninth Circuit rejected a claim of copyright in a piece of jewelry where the manner in which the parties selected and arranged the work’s component parts was more “inevitable” than creative and original. *See Herbert Rosenthal Jewelry Corp. v. Kalpakian*, 446 F.2d 738, 742 (9th Cir. 1971) (finding a jewel encrusted bee pin uncopyrightable). Likewise, the Ninth Circuit has held that a glass sculpture of a jellyfish consisting of clear glass, an oblong shroud, bright colors, vertical orientation, and the stereotypical jellyfish form did not merit copyright protection. *See Satava v. Lowry*, 323 F. 3d 805, 811 (9th Cir. 2003). The language in *Satava* is particularly instructive:

It is true, of course, that a combination of unprotectable elements may qualify for copyright protection. But it is not true that *any* combination of unprotectable elements automatically qualifies for copyright protection. Our case law suggests, and we hold today, that a combination of unprotectable elements is eligible for copyright protection only if those elements are numerous enough and their selection and arrangement original enough that their combination constitutes an original work of authorship.

Id. (internal citations omitted).

Similarly, while the Office may register a work that consists merely of geometric shapes, for such a work to be registrable, the “author’s use of those shapes [must] result[] in a work that, as a whole, is sufficiently creative.” COMPENDIUM OF U.S. COPYRIGHT OFFICE PRACTICES § 906.1 (3d ed. 2014) (“COMPENDIUM (THIRD)”); *see also Atari Games Corp.*, 888 F.2d at 883 (“[S]imple shapes, when selected or combined in a distinctive manner indicating some ingenuity, have been accorded copyright protection both by the Register and in court.”). Thus, the Office would register, for example, a wrapping paper design that consists of circles, triangles, and stars arranged in an unusual pattern with each element portrayed in a different color, but would not register a picture consisting merely of a purple background and evenly-spaced white circles. COMPENDIUM (THIRD) § 906.1.

Finally, Copyright Office registration specialists (and the Board) do not make aesthetic judgments in evaluating the copyrightability of particular works. *See* COMPENDIUM (THIRD) § 310.2. The attractiveness of a design, the espoused intentions of the author, the design’s visual effect or appearance, its symbolism, the time and effort it took to create, or the design’s commercial success in the marketplace are not factors in determining whether a design is copyrightable. *See Bleistein v. Donaldson Lithographing Co.*, 188 U.S. 239 (1903). Thus, the fact that a work required effort to create, or has commercial or aesthetic appeal, does not necessarily mean that the work constitutes a copyrightable work of art.

B. Analysis of the Work

After carefully examining the Work and applying the legal standards discussed above, the Board finds that the Work does not contain the requisite creative authorship necessary to sustain a claim to copyright.

Here, it is undisputable that the plain and twisted bands and oval loop are all common and familiar forms, in the public domain, and therefore not individually subject to copyright protection. See C.F.R. § 202.1; see also Second Request at 2. It is true that a work comprised of public domain elements may be copyrightable if the selection and arrangement of those elements is not so obvious or minor that the “creative spark is utterly lacking[.]” *Feist*, 499 U.S. at 359; see also COMPENDIUM (THIRD) § 312.2 (“[P]ublic domain elements may satisfy the requirement for copyrightable authorship as a compilation if they are selected, coordinated, and/or arranged in a sufficiently creative manner”). Accordingly, although the individual components of a given work may not be copyrightable, the Copyright Office follows the principle that works should be judged in their entirety and not based solely on the protectability of individual elements within the work. *Atari Games Corp. v. Oman*, 979 F.2d 242, 244-245 (D.C. Cir. 1992).

The Board finds that, viewed as a whole, the selection, combination, and arrangement of metal bands, metal wrapping, and oval loop and single gemstone is not sufficient to render the Work original. The Work consists of little more than metal bands arranged in a common and obvious manner, a loop affixed to the bands in a typical configuration with simple wire wrapping around, as well as a single gemstone arranged in the middle of the loop. Ronaldo Jewelry argues that the Work “is not a simple bangle bracelet” but instead is an artistic work that uses “different shapes and textures to create a decorative bracelet.” Second Request at 6. While the Work certainly uses different shapes and textures, it does not combine or arrange them with enough creativity to merit copyright protection.

Additionally, we further note that Ronaldo Jewelry’s stylistic choices and design alternatives have no bearing on the Board’s analysis. The creative process often requires many choices. It is not the variety of choices available to the author that must be evaluated, but the actual work. See *id.* § 310.8. Viewed as a whole, the level of creative authorship involved in this configuration of unprotectable elements is too *de minimis* and trivial to enable copyright registration. See *id.* § 313.4(B).

Furthermore, Ronaldo Jewelry argues that it is unaware of any “other known work to have similarly recast or arranged the design elements in the same way” so the work is sufficiently original to warrant registration. Second Request at 5. The Board examines each work independently to determine whether it satisfies the originality requirement; the fact that a work may be distinct from others does not necessarily mean it is protectable. See *id.* § 310.1.

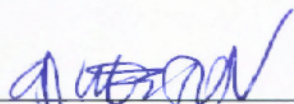

The Board further finds that Ronaldo Jewelry’s request that the Work be registered under the “Rule of Doubt” provision to be misplaced. Under the Rule of Doubt, the Office may on occasion register a claim to copyright even though the Office has reasonable doubt as to whether the material submitted for registration constitutes copyrightable subject matter or other legal and formal requirements of the statute have been met. See COMPENDIUM (THIRD) § 607. For example, the Office may register a claim under this provision if it is unable to examine the deposit copy to determine whether the work has copyrightable authorship or, in exceptional cases, when the Office has not taken a position on a legal issue that is directly relevant to whether the work constitutes

copyrightable subject matter. *Id.* Neither of these circumstances is present in this situation. Accordingly, the "Rule of Doubt" provision is not applicable with respect to the Work.

IV. CONCLUSION

For the reasons stated herein, the Review Board of the United States Copyright Office affirms the refusal to register the copyright claim in the Work. Pursuant to 37 C.F.R. § 202.5(g), this decision constitutes final agency action in this matter.
